Summary

Software Architect and Strategic Tech Lead specialized in the design and scalability of high-availability distributed systems. Expert in .NET and Node.js ecosystems, with a proven track record of aligning complex technical roadmaps with business objectives while leading architecture and cloud infrastructure departments. Technical mentor and instructor with a passion for transformative leadership, best engineering practices (SOLID, Clean Architecture), and driving organizational performance through constant innovation and CI/CD optimization.

Experience

Mar 2026 – present **Tech Lead**, Craftlabs – Buenos Aires, AR

Leading high-priority strategic initiatives and spearheading the development of mission-critical internal systems and automated toolsets.

- Orchestrating a cross-functional in-house team of 4 engineers to deliver high-impact internal tools utilizing Dotnet, Azure, and Python.
- Driving the architectural vision and technical roadmap for internal systems, prioritizing scalability, security, and maximum business impact.
- Modernizing internal workflows through the implementation of robust Angular frontends and high-performance backend microservices.
- Managing full project lifecycles from stakeholder requirements to production deployment, ensuring alignment with company-wide strategic goals.
- Leveraging AI-powered tooling to accelerate and harden the development process through spec-driven development (OpenSpec).

Feb 2023 – Feb 2026 **Lead Architect**, Remitee – Buenos Aires, AR

Head of the Architecture and Cloud Infrastructure Department, directing two senior specialized teams (6 members total) and defining the technological roadmap for product scalability.

- Managed and mentored two senior cross-functional teams of Architects and Cloud Engineers, fostering a high-performance engineering culture.
- Directed the implementation of Terraform for Infrastructure as Code (IaC), overseeing the governance of 500+ Azure resources.
- Orchestrated critical migrations of core services to modern stacks, significantly improving system resilience and delivery velocity.
- Defined and governed enterprise-wide architectural standards, ensuring security and high availability for financial digital products.
- Provided strategic oversight for R&D initiatives, aligning emerging technology adoption with fintech market trends.

Feb 2022 – Feb 2023 **Technical Leader**, SoullT – Buenos Aires, AR

Strategic manager for multiple developer teams, responsible for technological vision, Agile methodology implementation, and professional development.

- Led and orchestrated two concurrent development teams (3-4 members each), optimizing project delivery through Agile best practices.
- Directed the architectural transition of legacy applications from PHP to modern Node.js (NestJS) and React ecosystems.
- Managed the full application lifecycle for enterprise .NET 6/React stacks, ensuring 99.9% uptime and performance optimization.
- Mentored senior and junior engineers in Clean Code and SOLID principles, reducing technical debt and improving code quality.

Jan 2019 – present **Software Architect & Developer**, Freelance – Remote

Frontend and Backend development, architecture consultancy, and technical documentation.

- Provided architecture consultancy and technical documentation for complex software projects.
- Architected and deployed several custom Web APIs from scratch, prioritizing security and modularity.
- Successfully migrated a legacy MVC web application from .NET Framework 4 to .NET Core 5, resulting in 30% faster server response times.
- Developed complex Web Scraping solutions for government data extraction to support doctoral-level research projects.

Jan 2023 – present **Technical Instructor / Teacher**, Coderhouse & EducacionIT – Argentina

- Delivered 'Backend Programming in JavaScript' (Node.js) and 'C# Programming' courses at Coderhouse.
- Instructed 'Web API .Net Core' at EducacionIT, covering RESTful design, authentication, and database integration.
- Served as an Instructor/Mentor in 'Argentina Programa 4.0', teaching Next.js, Django, and SQLite.

July 2019 – Sept 2019 **Developer**, ANSES – Buenos Aires, AR

- Engineered new modules for the internal HR application, optimizing internal data management processes.

Sept 2018 – July 2019 **Developer**, Ministerio de Producción – Buenos Aires, AR

- Collaborated in a large-scale team using Agile workflows to deliver public sector software.

May 2015 – Sept 2018 **Software Tester Analyst**, Ministerio de Trabajo, Empleo y Seguridad Social – Buenos Aires, AR

- Executed comprehensive manual and automated testing suites within the Product Quality area.

Skills

Backend Engineering: C#, .NET Core/6+, Node.js, NestJS, Python, Django, Web API, CQRS

Frontend & Mobile: ReactJs, Next.js, React Native, TypeScript, Angular, Blazor, HTML5, SASS

Architecture & DevOps: Clean Architecture, SOLID, Terraform, Azure, Cloud Infrastructure, CI/CD, Docker, Aspire

AI & Automation: AI Agents, Spec-Driven Development (OpenSpec)

Databases: SQL Server, PostgreSQL, MySQL, SQLite, MongoDB, Query Optimization

Leadership: Team Mentoring, Project Estimation, Stakeholder Communication, Strategic Planning

Education

2023 – 2026 **ISTEA**, Higher Technician in Software Development – Argentina

Certificates

- SQL Server Optimization & Performance - EducacionIT (2022)
- Advanced Architecture in Node.js - EducacionIT (2021)
- Advanced React.JS - EducacionIT (2021)
- Leadership & Team Management - EducacionIT (2022)

Languages

Spanish: Native

English: Advanced / Professional

Volunteer Experience

2021 – 2025 **Technical Mentor**, Emplear + Empujar

- Volunteered as a mentor to help youth in vulnerable situations bridge the gap into the IT job market.
